1. GRAPH TYPE 1

- Flow of the chart is from left to right.
- For each step, methods are defined from top to bottom.

Pros:

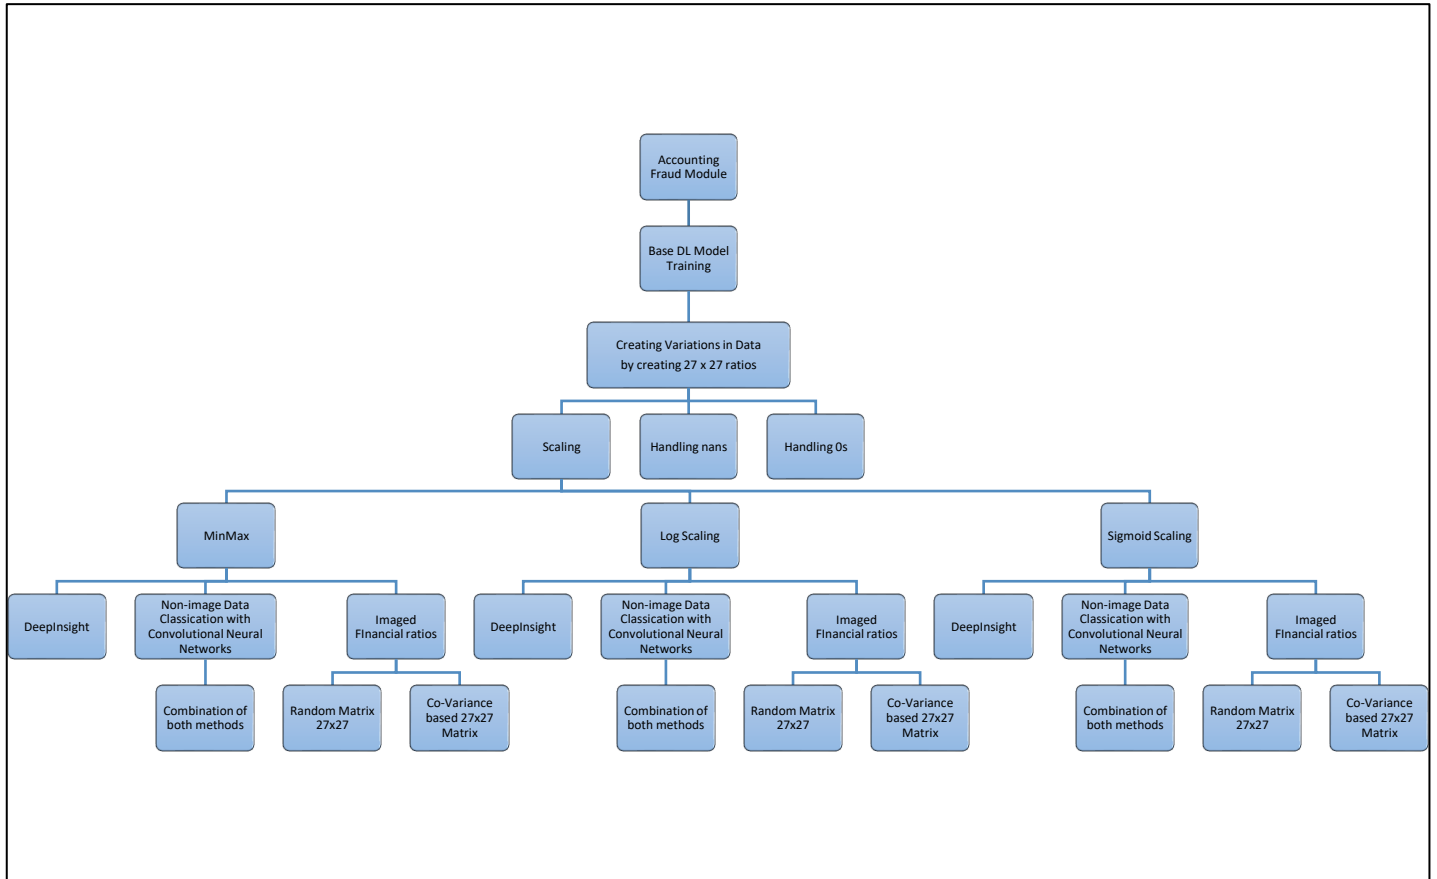

- Easy to understand each step.
- Requires less space.
- Easy to add new methods without complicating the graph.

Cons:

- Structure is not tree based.
- Need to add colors to define rejected and accepted methods.

2. GRAPH TYPE 2

- Flow of the chart is from top to bottom
- On each node, branches are created for each possible method.
- For each branch, all possible future methods are replicated.

Pros:

- We can see results for each step.
- Easy to understand.

Cons:

- The graph will become convoluted.
- For each new method, a whole redundant branch has to be created.
- Requires a lot of space.
